

THERAPEUTIC GUIDE

ABSCESS

A localized collection of pus in any part of the body, accompanied by local inflammation and often the result of a bacterial infection. Local destruction of the surrounding tissue can occur, both due to bacterial toxins and the body's inflammatory response. Many abscesses, particularly if they are small, can reabsorb naturally without the need for incision and drainage. Therapeutic strategies can include supporting the immune system, draining the lymphatics, and assisting with tissue healing.

Homeopathics

- * **BAC HP™**- high potency formula indicated for bacterial infections.**
- Bactestat™**- homeopathic detoxifier indicated for bacterial infections.**
- Calc Sulph**- single homeopathic remedy indicated for a variety of skin infections including abscesses.**
