## DIGESTIVE SYSTEM TESTIMONIALS

"I often use **DIGESTZYME** with my clients. I find it to be quite effective especially for people who have a large number of food intolerances, maldigestion or malabsorption. Recently I recommended it for a woman who has fibromyalgia, irritable bowel syndrome, and whose eating options were extremely limited. Along with a probiotic and a few small changes, she is now able to eat a much wider variety of foods without issue. Often I find that the **POWDERED DIGESTZYME** is specifically useful for children and for people who want to begin with just a tiny dose and build up. I'm really happy to have this product on my shelf."

-Liz Lipski, PhD, CCN, author of *Digestive Wellness* and *Digestive Wellness for Children*

"Our practice focuses on the care for special needs children and any patient who has GI issues. Certainly improving digestive function and GI flora will help with dysbiosis. Allopathic medicine tries to fix the symptoms rather than help 'normalize' the terrain/milieu and allow the body to heal itself or to optimize well being at whatever level of function that may be. We have used Transformation's digestive and probiotic formulas for many years and we find as the patient's terrain and gut improve, absorption is enhanced and oftentimes we are able to reduce medications."

- Rolf Habersang, MD, ICAM, Amarillo, Texas

---

"Thanks for the follow up. I am using the **DIGEST** and **GASTRO** for digestive disorders with great results. Also I have a new patient on the enzymes and she reports that they are helping her as well."

-Frenesa K. Hall, MD, Chief Medical Officer, Mobile-Medicine.Net

"My cousin's son is one and a half years old has had heart surgery, has a feeding tube and Down's syndrome. He was having digestion issues and is doing much better since he started taking the Transformation **PLANTADOPHILUS** and **DIGESTZYME** caps (flush). Jaden's nutritionist did his monthly assessment on him and he has grown 1 inch in length, 1/8 inch in head circumference. Growth implies good nutrition absorption and I believe the supplements have helped with that. She was impressed. Also, despite his bouts with illness, his weight was acceptable. So there's a testament for you. Just wanted to share the message with your company and thank you for making such a pure and powerful product..."

TRANSFORMATION ENZYME CORPORATION

"No, I haven't dropped off the planet! But, all of a sudden I got real busy - which may reveal a lot, as I am feeling better than I have in years. I added a couple of diet changes you recommended, and **DIGESTZYME** and **PROBIOTIC**. In other words, small changes made a big difference!"

-Jeff Smiley

"Thank you for changing my life through Transformation products. Since I have been taking **DIGESTZYME** and the enzyme protocol recommended, I have gained 24 lbs. After losing half of my stomach to cancer I lost 24 lbs within two weeks. Following my surgery I went through three months of chemotherapy. I saw several doctors and a nutritionist at MD Anderson and they were not able to help me. I spent countless months trying desperately to gain weight after my chemotherapy treatments. I am now at a weight of 115 and feel much better. As if this is not enough, you have helped me to regain control of my body in other ways. During my second visit after chemotherapy, I had a doctor come in and tell me, 'We can't understand but your area in question is shrinking. Usually the area we are watching grows or spreads but this area is shrinking.' I had been taking **PROTEASE IFC** and **PUREZYME**. This is something you hoped we could accomplish and we did... I want to thank Transformation for the research and for your care. You have been very supportive and kind in this difficult time for me. I have recommended your products and services to many people who have a need and wish them the same results as I have had."

-Debora Galmiche Stuhr

"My niece Lu is doing great. She is in the 50% percentile BMI, which is fabulous for a cystic fibrosis kiddo. Taking enzymes is normal to her and the whole family takes them. She began taking **DIGESTZYME** by syringe during her first week and was taking **DIGEST**, **PUREZYME** and **PLANTADOPHILUS** by her first birthday. She has been hospitalized a total of 3 times in 5 years which is also a huge accomplishment as most CF kids are in and out of the hospital several times a year. I spent one morning at the doctor's office for a check up, and her doctor's and nurse's are amazed at how well Lu is doing. I also spent the afternoon at her kindergarten. It was fun to see how much she likes school. Just thought I would give you all an update."

-Nina Rowan, Rowan Health

"My mother had received the operation on July 22nd and she has already left the hospital. At that operation, her stomach was totally removed, and we confirmed that the tumor invaded through the stomach wall. After the surgery she suffered from appetite loss and general fatigue. She began taking **DIGESTZYME**, **PUREZYME** and **PLANTADOPHILUS** and thanks to your advice and prescription, my mother is getting better day by day. She has never felt fullness of abdomen since she took enzyme supplements that you told us. And she actually rejected to take chemo agents. Anyway, it is our great pleasure to see her smile! Thank you all for your kindness."

-Michiko and Hiroo Hata, MD, Hokkaido University Graduate School of Medicine, Japan

"When we had our first meeting with the *Rome's Biggest Loser* contestants I took a poll regarding digestive health. Out of 20 contestants:

- 11 had their gall bladders removed
- 6 complained of constipation (one had a complete blockage and had to drop out for medical reasons)
- 16 said they suffered from frequent gas, bloating and indigestion.

"After two weeks almost every person was asymptomatic. There were very few complaints of indigestion, frequent bloating and gas. The combination of **PROTEASE**, **DIGEST** and **PROBIOTIC** ensured that each contestant would be able to digest, assimilate and use the nutrients they were consuming. Without these products it would have been impossible for the contestants to lose such a large amount of weight in just six weeks.

One participant made the following comment: 'I was lucky enough to be chosen as one of the participants in the *Rome's Biggest Loser* program. Whether or not I am the ultimate winner of the competition, I have already won by losing over 15 pounds in six weeks. I have used many supplements over the years, but not often for weight loss. Your efforts to ensure digestive health are much appreciated! I was eating a lot of food, and I am sure that your products helped me digest it effectively. I will be sure to recommend your products to anyone seeking good digestive health.'"

-Erik Korem, MS, CSCS, SCCC, USAW Level I Speed Development Coach, Pro Performance

---

"Dr. Kevin Amen LOVES our **PROBIOTIC**. He has many missionary families on it. And now I am getting the story 3rd generation about how all the 'others' got 'travelers' disease, and the ones who were taking our **PROBIOTIC** did not get sick."

-Dawn Aubrey, CCN

---

"My mother complained of extreme gall bladder pain and inflammation and had a referral to visit with a surgeon to have it removed. After only being on **DIGEST** and **GASTRO** with each

meal for a week, her pain was gone and the surgeon decided that surgery was not necessary. She was able to avoid losing a vital organ and the recovery time associated with surgery. And she felt so good, she told my Aunt who was taking two capsules of the highest strength Nexium daily for extreme acid reflux. After taking **DIGEST** and **GASTRO** with each meal for one week, she no longer needs Nexium at all!

-John Buchman, Regional Sales Manager, TEC

### (For Pets)

"Just wanted to take a moment to let you know how wonderful your products are. I have had tremendous success in particular with two of your products in my veterinary practice: **GASTROZYME** and **PROBIOTIC**. The products are very gentle and well tolerated even by small 3 lb pets. I use the **GASTROZYME** and **PROBIOTIC** (dosages vary depending upon size of pet) for cats and dogs with irritable bowel syndrome and any type of gastrointestinal distress. Just recently, I adopted a beautiful white husky named Blue who had waited for two years to get a home because he has severe irritable bowel syndrome and pancreatitis. I have had to proceed very slowly with him because any change causes a reaction--even if it is a change for the better. Blue was belching and regurgitating most of the night even though he was on special food for a sensitive stomach. I introduced the **PROBIOTIC** and saw immediate results--he slept through the night comfortably and his loose stool firmed up. This is not a one-time incident. I hear from many cat and dog owners that these two products have helped their pets' loose stool and tummy rumbling almost instantaneously. I have tried other manufacturers and have not found the same results. Thank you!!!!"

-Susan Davis, CCN, Pet Nutritionist
