

Inflama-GI[™]

Maintains a healthy GI inflammatory response[◆]

- Turmeric root extract (95% curcuminoids)
- 500 mg arabinogalactan
- Soothing aloe vera gel and marshmallow root

44038 - 180 G

Healthy Support

Inflama-GI is geared toward supporting two interconnected aspects of optimal gastrointestinal health, inflammation and immunity.◆ It is well established that 70% of the immune system is found in the GI tract. This formula supports a healthy mucosal lining of the lower intestinal tract, which in turn supports IgA secretion and gut lymphoid associated tissue (GALT).◆ Turmeric Root Extract (95% curcuminoids), Boswellia Serrata Extract and Ginger Root are key inclusions to support a healthy inflammatory response locally.◆ The combined application of immune and inflammatory support makes this product an excellent addition to any nutritional protocol focused on optimizing gastrointestinal health by supporting a healthy inflammatory response and a healthy immune response.◆

A Look At Key Ingredients:

Turmeric/Ginger: A 2011 study outlined the multiple mechanisms turmeric and ginger possess for supporting a healthy inflammatory response.◆

Source: Al-Suhaimi EA, et al. Physiological and therapeutical roles of ginger and turmeric on endocrine functions. *Am J Chin Med.* 2011;39(2):215-31.

Curcumin - This principal curcuminoid in turmeric has been noted in research studies for its ability to scavenge free radicals, increase antioxidants and influence multiple signaling pathways.◆
