## SKELETAL SYSTEM TESTIMONIALS

"I just got off work and I feel Amazing!!! My arthritis is gone! Normally I'm in great pain after an 8hr shift. Those days are GONE!! Transformation Enzymes Rock!!"

-Crystal Hess

---

"My husband has begun taking **LYPO**, **PROTEASE IFC**, **PROTEASE**, **DIGEST** and **PROBIOTIC** and is absolutely thrilled with how they make him feel and how it has helped lessen the pain in his knees. He now has begun to lose some weight after many years of battling."

-Lynda King

---

"While moving into my new office building I fell and shattered my ankle bone. I had to have reconstructive surgery and the orthopedic surgeon told me I would be on crutches for 6 months. As soon as I was out of surgery and able to eat, I began taking my enzyme regimen that included additional **PROTEASE IFC** and **REPAIRZYME**. I am happy to report I was off crutches in 3 months!"

Duane Miller

---

"I dislocated my shoulder in the worst way. They had to perform surgery just to get it back into place. At my 3 week follow up appointment the Dr. asked for me to pull my arm out of the sling so we could see if I could move it. After just 3 weeks I had almost a full range of motion back. Thank you **PROTEASE IFC** and **REPAIRZYME**."

-Dee Schore

---

"Thank you Transformation! I sustained a wrist injury 2 days prior to my annual golf trip. I wasn't even able to pick up a bottle of water and was on the verge of canceling the trip. Frantically, I called my chiropractor who recommended your products. Much to my surprise, after 24 hours of taking your **PROTEASE IFC** and **REPAIRZYME** I was able to play 3 rounds of golf PAIN FREE!"

-Chris Barnes

---

"Just thought I would let you know a little testimonial. A friend's daughter just got her braces adjusted and we were out to lunch and her mom ordered her a panini sandwich which was too hard for her to eat because her teeth were hurting her. I gave her 2 **PROTEASE IFC** and within 10-15 minutes she said her teeth did not hurt any more."

-Jan Davis

"The last time I went to my dentist was for some unexplained pain that I thought was a cracked tooth. The dentist couldn't find anything wrong, but thought the pain may be stress induced. It was about this time that I increased my **PROTEASE** dosage. Happily, the pain went away within a few weeks. I just returned from my 6 month checkup at the dentist. After the hygienist cleaned my teeth the Doc came in and seemed to be taking an extra long time poking around my teeth and gums. He turned to the hygienist and said, 'Correct me if I'm wrong Jan, but Lisa's gums have never looked so good - they're gorgeous... and her tooth pain is gone - must be divine intervention.' I believed in my gut that the protocol I was working with would benefit me, but it's always nice to have outside, unbiased, 'medical' validation (in an unexpected area!). I realize you work very hard to help your clients, so I wanted to say Thank You and give you a thumbs up for doing such a great job."

-Lisa Harner
